Role Information Pack

Generator Engineer

Belvedere / South East, UK

Salary: £44,796.00 D.O.E

Reports to: Operational Services Lead | **Term:** Full time - Perm

Power the Future. ***Maintain the Past.***

Position Summary:

A **Generator Service Engineer** is responsible for the maintenance and troubleshooting of electrical generators and associated power generation systems. They ensure reliable and efficient performance of generators in industrial, commercial, or utility settings by conducting inspections, performing preventive maintenance, diagnosing faults, and implementing repairs or upgrades. Generator Engineers collaborate with cross-functional teams to optimize system performance, ensure compliance with safety and regulatory standards, and support continuous improvement initiatives to enhance equipment reliability and energy efficiency.

Key Responsibilities:

- Carry out planned maintenance and servicing on standby generators up to 2.5 MW
- Diagnose faults and perform repairs in a timely and efficient manner
- Complete site reports and documentation to a high standard
- Liaise with customers to provide excellent service and support
- Ensure compliance with all health and safety regulations
- Assist with installations and commissioning where required
- Participate in an on-call rota for emergency support and planned weekend work and out-of-hours support when required.

Qualifications & Certifications (Desired)

- GCSEs or A-Levels
- CSCS or equivalent
- 18th edition

Abilities

Essential Skills

- Proven experience servicing and maintaining diesel generators (whether within the standby or rental sector)
- Strong fault-finding and diagnostic skills
- Excellent communication and customer service skills
- Full UK driving licence
- Take part in the company on-call rota - 1 in (7) weeks

Personal Attributes

- Highly organised and proactive.
- Methodical with strong attention to detail.
- Able to work independently and within a project team.
- Calm under pressure and adaptable to fast-paced environments.

Benefits

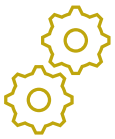

- Basic salary of - up to £44,796.00 D.O.E
- 4% pension, matched by company + life assurance and private health care after successful probationary period
- 25 days holiday
- Company vehicle and fuel card
- Specialist tools and uniform provided
- Opportunities for overtime at 1.5x and 2x rates – weekend day rates
- On-call payment of £200.00
- Ongoing training and career development opportunities
- Option to work on international projects at an enhanced pay rate

Why join Bells?

For more than 120 years, Bells has been helping to power some of the UK's most iconic developments while delivering critical power solutions around the world. Our success is built on a simple foundation: great people, technical excellence, and a commitment to doing things the right way.

With over 100 years of experience, Bells are one of the UK's most trusted names in power generation.

From major infrastructure and data centres to international installations, our teams work on a wide range of complex and rewarding projects across the UK and beyond.

We provide trusted expertise in the design, pre-fabrication installation, service, and maintenance of standby power solutions.

We invest in our people, providing opportunities to learn, grow and take ownership of meaningful work alongside experienced industry professionals.

Shaping the Future of Power

While we're proud of our heritage, we're equally focused on what's next. Through innovation, digital technologies and forward-thinking engineering, we're helping shape the future of power generation and critical infrastructure.
